

COLOR CODED QUICK CONNECTS

QUICK CONNECTS —

Easily identifiable, keyed, color-coded hose connections to help eliminate contamination

These unique Quick Connects maintain purity across your lubricant storage and distribution processes. The color-coded, anodized aluminum fittings eliminate cross contamination. They are easy to use, nearly impossible to confuse or cross connects, and integrate with a wide range of lubrication management systems and equipment.

Zero-leak, precise, and secure hose terminals will increase safety and efficiency by eliminating spills and wastes throughout your facility.

FEATURES

TEN OILSAFE COLORS

Color-Coded and keyed female connectors will only fit the color-corresponding male connector

UNIVERSAL CONNECTION

Silver terminals are available as a universal fit for all 10 colors, permitting easy connections for any special use case

SOLID CONSTRUCTION

Strong, aluminum, flat face connectors, capable of handling a max of 1000psi
